

Be Indian Buy Indian

"DECONYX" an Indian, First manufacturing unit to produce alabaster. Its world's first unit to manufacture exterior and interior grade alabaster.

The best Characteristics of alabaster is that it can transmit light and has various styles and designs. It looks like natural stone and is easy to operate. It has advantage of being bent and has seamless joint property too. "Deconyx" is the only company in the world to produce exterior grade alabaster. Colourful architectural surface in matt finish is always the like of architects and we give our best to fulfil their needs. The elegance, design and quality really express the beauty of "Deconyx" material. Our upgraded technology and techniques offer visually perfect and easy in installation material for exterior and interior surface beautification. Transportation problem has no place in "Deconyx".

"Deconyx" has a dream to provide unique and monopoly products. A lot of new products are in pipeline. Quality and service are both hands of "Deconyx".

Unique Products Coming soon

- Natural Stone Sinks
- Natural stone Mirrors
- Natural Stone Vanity Counters
- Bathtub
- Bathroom Accessories

Covering new Environments, with last Generation Materials beyond our Dreams.

Applications:

- Hotel
- Resort
- Restaurant
- Bar
- Cafeteria
- Club house
- Banquet hall
- Mall
- Multiplex
- Showroom
- Corporate office
- Spa
- Beauty salon
- Gazebo
- Elevator
- Residence

Features

- Backlit Application
- Aesthetic
- Natural Look
- Highly Chemical Resistant
- Available in many Designs
- Approx Size 8'x4'
- A Versatile, Robust & Hygienic Surface.
- High Resistance to External Stress (abrasion, Impacts, Stains etc.)
- Non Porous, Waterproof Surface.

Bar Counter

DECONYX is made by high molecular polyester resin. It looks like a natural stone and is not as expensive as them. It is easy to operate which makes it extremely popular worldwide. The best characteristics of **DECONYX** is that it can transmit light and has various styles and design to choose from. It has the advantages of being bent and seamless joint process.

Specifications of DECONYX

Standard size: 4' x 8' (Approx) Thickness: 4mm

Range of application:

Decorative wall panel, bar top, table top, light-through structure, translucent walls, ceilings, bar tables, lamps, columns of commercial buildings and household decoration purpose.

Performance of Landscape stone products:

Possessing the natural texture of marbles, smoothness of ceramics and the elasticity of lumber, **Deconyx** Series could be processed without joints. Besides, they offer many designs to choose and are easy to clean and convenient to fix. Scientific tests verify that **Deconyx** series have neither radioactive pollution nor toxic side effects. So far, these environmental friendly stones have been widely applied into various kinds of decoration projects.

Process and installation of Landscape stone products:

Easy to fabricate & install. Can fabricate on the spot. Wood-cutting saw or marble-cutting saw for cutting, hand drill machine for hole-drilling, router machine for edge chamfering & bending by heat.

The Photographs just show the partial effect. Its colour, effect and veins are not absolutely the same. Please see the samples for original colour & effect to avoid confusions. All designs are random.

| No. | Inspected areas | Unit | Standard | Result | Conclusion |
|-----|---------------------------|--------|--|---------------------|------------|
| 1 | Density | g/cm | ≥ 1.2 | 1.4 | Qualified |
| 2 | Hygroscopic Capacity | % | ≥ 0.4 | 0.05 | Qualified |
| 3 | Stretching Strength | Мра | ≥ 15 | 38 | Qualified |
| 4 | Compressed Pressure | Мра | ≥ 20 | 100 MPa Unbroken | Qualified |
| 5 | Flexural Ability | Мра | ≥ 10.0 | 68.2 | Qualified |
| 6 | Hardness | Degree | ≥ 80 | 88 | Qualified |
| 7 | Heat Resistance | | Put it into 100°C boiling water for 1Hr no bubbles appears | Pass | Qualified |
| 8 | | | No obvious change in color | Pass | Qualified |
| 9 | Cigarette Burn Resistance | | No marks left behind but colors slightly turn in yellow (put the burning cigarette on the surface 60 sec) | Pass | Qualified |
| 10 | Acidity Resistance | | (Permeated in 30% hydrochloric acid for 24 hrs) no obvious change for appearance | Pass | Qualified |
| 11 | Alkalinity Resistance | | N(Permeated in 10% alkali for 24 hrs) no obvious change for appearance | Pass | Qualified |
| 12 | Stain Resistance | | Tea stains, coffee stains and ink can be cleaned easily by normal cleaning detergent (maintain the stings on product surface 24 hrs) | Pass | Qualified |
| 13 | Radioactivity | 1ra | Out 1. Building Material | 0.99 | Pass |
| 14 | Radioactivity | lr | 1. Out1. Building Material ≤ 1.0 2. Decoration Material ≤ 1.3 | 0.77 | Pass |

SIGNAGE BOARD

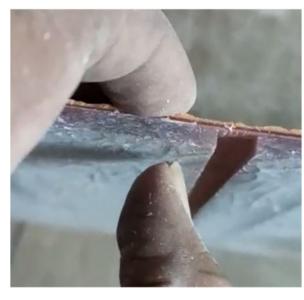

- CNC engraved deconyx panel with aluminum framing
- Backlit installation
- Installation similar to ACP panels
- Halfcut groove can be used to fold the panel with heating process

DECONYX INSTALLATION GUIDE

SHEET BENDING PROCESS

Depth of the grove should be between 2 to 2.5mm which will lead to the 1 to 1.5mm thick sheet left which should be appropriate for bending or else it will crack

On the 4mm Deconyx sheet first step to bend the sheet is to make a 6mm thick grove over the bending edge.

BACK LIGHT PANELS

Back light application: Allow backspace of 1.5 to 2 inch behind the Deconyx sheet to avoid light reflection. Amount of space behind the sheet may vary with different types of light and its application

Using heat thrower slowly heat both the side of the sheet over the bending edge. Make sure to not over heat the sheet. Don't bend the sheet directly after heating or else it may cause crack let it cool for few second and when its still warm carry on bend this will lead to proper bending of the sheet. Also you can pour silicon between the grove for more stability and strength.
